

THARIQ HAMAD

Senior Product Manager | Fintech & Digital Products

Thariqhamad6@gmail.com | +966 56 344 1876 | <https://www.linkedin.com/in/thariqhamad> | Riyadh, KSA | Transferable Iqama

SUMMARY

Product Manager with 8+ years of experience designing and delivering digital financial products, payment systems, and fintech-adjacent platforms across B2B and B2C environments. Built a split payment and peer-to-peer disbursement product from scratch, integrated payment gateways, and architected a community-funded token model with automated revenue-share distribution. Experienced in BNPL product design, KYC workflow ownership, subscription monetisation, and delivering SaaS products in regulated and fast-moving market conditions. Based in Riyadh, Saudi Arabia, with a Transferable Iqama. Available immediately.

EXPERIENCE

Product Manager (FTC)

Fortude | Colombo, Sri Lanka (Hybrid)

October 2024 - January 2026

- Executed a targeted B2B campaign generating a SAR 7M+ pipeline with SAR 700K in immediate conversions from a SAR 3.75K budget, 1,800% ROAS. Presented results at board level.
- Owned product roadmap, stakeholder alignment, and GTM execution for two SaaS products across KSA and GCC markets.
- Managed a cross-functional team of ~30 and built a centralised sales enablement data room used by regional teams.

Product Lead

FieldR | Colombo, Sri Lanka (Remote)

June 2019 – May 2025

- Designed and built a peer-to-peer split payment feature enabling team captains to collect event fees from individual players via the app. Funds were escrowed at the captain's wallet level and disbursed automatically, modelling the same financial flow used in platforms like Stripe Connect and Splitwise.
- Owned end-to-end integration of payment gateways into the platform, including transaction handling, failure recovery flows, and reconciliation logic, translating business requirements directly into technical specifications for the development team.
- Designed a dual-revenue model combining SaaS subscription fees and per-event platform take-rate on payment transactions. Converted 75% of active users to paid tiers through a structured onboarding and value communication strategy.
- Applied A/B testing to validate payment UX flows across captain and player personas, reducing friction at checkout and improving payment completion rates.
- Managed a team of 12 across development, marketing, and operations using Agile; validated by registered coaches under Sri Lanka Cricket.

Product Manager

Sling Mobility | Colombo, Sri Lanka

June 2021 - May 2024

- Launched Sri Lanka's first community-funded battery token model, enabling individuals to fund the acquisition of 100 next-generation batteries. Designed the token issuance, ownership structure, and automated revenue-share distribution mechanism functioning as a micro-investment and asset-yield product.
- Designed a subscription model with remotely de-activatable batteries tied to payment status, enforcing financial obligations at the hardware layer, a pattern used by embedded finance and asset financing products globally.
- Built a data-driven incentive model rewarding riders for efficient battery use and consistent subscription payments, resulting in a 45% increase in monthly revenue.
- Introduced subscription roll-over and peer-to-peer kilometre-sharing features, increasing rider subscription conversion by 17%.
- Managed all vendor, client, and partner relationships. Reported directly to CEO and presented financial models to the board.

Project Manager (FTC)

Motion Miracles | Colombo, Sri Lanka

January 2021 - May 2021

- Owned the full product plan for the BNPL feature, including user research, feature scoping, instalment logic, eligibility flow design, and phased delivery roadmap.
- Designed the end-to-end KYC (Know Your Customer) flow for the BNPL product, defining identity verification steps, document submission requirements, and approval state management aligned with regulatory onboarding norms.
- Delivered product specifications and acceptance criteria to the development team, managing scope against a fixed timeline.

Program Associate (FTC)

Good Life X | Colombo, Sri Lanka (Remote)

August 2020 - December 2020

- Managed an accelerator program for 10 startups and founders building eco-friendly products across Sri Lanka.
- Implemented an OKR framework to track each startup's progress against the accelerator's objectives.
- Advised founders on pitch deck improvements to standardize presentations ahead of investor engagement.
- Implemented digital marketing strategies for portfolio startups to enhance their lead generation efforts.

Project Manager

Win Authority Innovative | Wyoming, USA (Remote)

August 2018 - December 2019

- Delivered 8 SaaS and web application projects in a startup environment, managing development teams within timeline, budget, and scope.
- Supported business development through client pitching, pricing strategy, and resource planning.

Project Manager

MillenniumIT ESP | Colombo, Sri Lanka

July 2017 - July 2018

- Managed a SAR 1.5M banking sector project, overseeing a team of 4 developers across Sri Lanka and India.
- Presented weekly status, risks, and timelines to VP-level banking sector stakeholders.
