Riyadh, KSA | Transferable Iqama

SUMMARY

I join early-stage companies as the person who figures out what to build, builds it, ships it, and grows it. I've done this across EV mobility, AI SaaS, cricket analytics, and fintech, always in environments where the team is small, the roadmap is unwritten, and the pressure is real. I've been Employee #1. I've co-founded. I've taken products from a whiteboard to paying customers with no playbook. I understand that at an early-stage startup, the PM isn't just the person who writes specs, they're the person who unblocks everyone else. I'm open to equity as part of compensation and am aligned with the KSA startup market in the long term.

KEY ACHIEVEMENTS

4 Products from 0 to 1 | Team scaled from 0 – 34 | 4 Product Launches | 1,800% ROAS in LinkedIn Webinar Marketing | 8+ Years in Tech

WHAT I'VE DONE

Football Performance Analyst

Glacis United | DATA ANALYTICS

November 2025 - Present

Delivering match performance analysis reports and maintaining a custom-built analytics platform for the first team squad

Product Manager

Fortude | AI & ENTERPRISE SAAS

October 2024 - January 2026

Brought in to commercialise two struggling SaaS products within an ERP ecosystem. Built the GTM from scratch with no existing playbook.

- Designed and ran a LinkedIn webinar campaign targeting specific KSA and GCC decision-makers. SAR 700K converted immediately. 1,800% ROAS. First time this had worked in the company.
- Owned Charlie AI Answer Assistant. Identified that accuracy wasn't the problem; trust was. Added a data validation agent. Usage up 75% among early adopters.
- Built and launched an AI Insight Agent on top of Charlie's architecture. Toyota Sri Lanka signed up to evaluate automating their manual service job processes.
- Built a replicable GTM blueprint, documented the webinar campaign framework so any future product could replicate it. Managed ~30 people across dev, marketing, and sales.

Co-Founder & Product Lead

FieldR | SPORTS TECH & SAAS

June 2019 - May 2025

Co-founded Sri Lanka's first cricket analytics SaaS. Took it from idea to paying customers across two countries over 6 years alongside full-time roles.

- Embedded with club coaches and scorers under Sri Lanka Cricket to identify what data actually changed decisions. Shipped a platform capturing 30+ live data points per match, visualised for coaching workflows, not just dashboards.
- Converted 75% of active users to paid subscriptions. Secured SAR 20K pre-seed funding from a state entity. Expanded to Australia, signing 2 clubs for fielding analysis.
- Designed a split payment feature for team event fees, the captain collects, app disburses, platform takes a cut. Built the gateway integration and escrow-style flow end-to-end.
- Wound down strategically after competitive analysis identified CricHeroes' dominant scale advantage in B2C. The analytics infrastructure and payment product were the lasting IP.
- Ran a team of 12 across dev, marketing, and ops using Agile alongside a full-time PM role elsewhere.

Product Lead (Employee #1)

Sling Mobility | MOBILITY & CLEANTECH

June 2021 - May 2024

Joined a 1-person EV startup. Left with 34 people, a live B2B2C platform, Sri Lanka's first battery-swap network, and an Uber integration.

- Mobile app, web platform, IoT command centre, battery tracking, real-time navigation, swap station network, rider incentives, maintenance SOPs, and an EaaS subscription model. No product team, just me, engineering, and a whiteboard.

- Identified that riders were abandoning trips due to battery anxiety. Launched a real-time navigation feature tracking battery voltage and swap station proximity. Roadside assistance dropped 75%. Daily rides per rider went from 25 to 62.
- Built a behavioural incentive model from operational data. Monthly revenue up 45%. Subscription conversions up 17% after adding roll-over and kilometre-sharing features.
- Analysed charge-cycle data to extend battery lifetime from 2 to 4 years and ride range from 60KM to 100KM, no new hardware spend.
- Launched Sri Lanka's first battery token program, community-funded 100 new-gen batteries with automated revenue-share distribution. Revenue without raising a round.
- Negotiated and integrated with Uber Sri Lanka. Presented a campus EV model to a university and the Maldivian government. Reported directly to the CEO and board throughout.

Project Manager

Motion Miracles | GAMING & FINTECH

December 2020 - June 2021

- Consulted on 0-to-1 BNPL product launch, owned project plan, user research, feature scope, and KYC workflow design.
- Launched 23 hyper-casual games across multiple publishers, generating SAR 200K in new revenue.

Program Associate

GOOD LIFE X | STARTUP ECOSYSTEM

August 2020 - December 2020

- Managed an accelerator cohort of 10 eco-focused Sri Lankan startups. Implemented OKR tracking, advised on pitch decks, and supported lead generation strategy.

Project Manager

Win Authority Innovative | SAAS REMOTE

July 2018 - August 2020

- Delivered 8 SaaS and web application projects in a startup environment. Managed 4 developers within the timeline, budget, and scope.

Project Manager

MillenniumIT ESP | ENTERPRISE & BANKING

July 2017 - July 2018

- Managed a SAR 1.5M banking project, the highest-budget intern-led project in the company's history at that time.

HOW I WORK

Talk to users first | Ship a version 1 fast | Measure what changes behaviour | Kill what doesn't work | Write the thing if no one else will | Own the outcome, not the output

WHERE I'VE ADDED VALUE

AI / LLM Products | Fintech & Payments | EV & Smart Mobility | Sports Analytics | IoT & Command Centres | B2B SaaS GTM | 0-to-1 Platforms | Community & Token Models

EDUCATION & CERTIFICATIONS

BSc Information Systems & Business Management | University of Westminster
