

Thariq Hamad

Senior Business Analyst | Senior Product Manager

Riyadh, Saudi Arabia | thariqhamad6@gmail.com | +966565329004 | [Thariqhamad](#)

SUMMARY

Business Analyst and Product Manager with close to a decade of experience bridging business stakeholders and technology teams, owning requirements elicitation, documentation, and validation across enterprise SaaS, AI, mobility, and sports technology in support of strategic initiatives. Repeatedly functioned at Head of Product scope across Fortude, Sling Mobility, and FieldR while owning these requirements and validation functions, formally recognized as Head of Product at FieldR. Facilitated structured requirements sessions, steering committees, and decision-making forums with executives, product owners, technology teams, and vendors, translating complex business needs into clear, complete, and traceable requirements aligned to business objectives. Acted as an escalation point for complex or high-risk requirements issues across multi-team, multi-market product implementations, presenting outcomes at CSO and board level. Tracked KPIs and OKRs across every role, applied RACI frameworks to clarify decision rights, and consistently managed competing priorities and stakeholder expectations in fast-moving, ambiguous environments. Transferable Iqama - **Immediately available for both FTE & FTC engagements, based in Riyadh, Saudi Arabia, flexible with relocation across the greater GCC, call me to discuss product direction, objectives, and challenges.**

EXPERIENCE

Product Manager (Head of Product Scope)

Fortude

October 2024 - Present, Colombo, Sri Lanka

- Functioned at Head of Product scope for the Fortude AI SaaS portfolio, owning requirements strategy and product direction independently across a 30-person cross-functional team.
- Led requirements analysis for Fortest, an automated regression testing tool for Infor M3 ERP, identifying key workflows and business logic scenarios across Food & Beverage, Apparel, and LNG verticals and translating them into structured, traceable test coverage criteria aligned to business objectives.
- Developed a complexity assessment framework and a RACI matrix to clarify decision rights and prioritize requirements and test generation effort, scoring ERP workflows by business impact, frequency, and technical feasibility.
- Owned the structured knowledge and requirements architecture behind the Charlie AI Answer Assistant, defining input templates, data credibility criteria, and response validation logic to ensure output met enterprise-grade acceptance standards.
- Designed a formal validation and acceptance criteria framework for AI output, increasing early adopter usage by 75%.
- Facilitated structured requirements sessions, steering committees, and decision-making forums with enterprise stakeholders and technology teams, translating complex workflow needs into functional specifications, and presented strategic initiative progress and delivery outcomes at CSO-level and board reviews.
- Tracked KPIs and OKRs across the product roadmap and built a centralized knowledge repository enabling regional teams to self-serve structured documentation, improving consistency of requirements input across multiple client implementations.
- Acted as escalation point across a cross-functional team of 30 (development, QA, marketing, and sales) for complex or high-risk requirements issues, managing competing priorities and stakeholder expectations.

Head of Product

FieldR

October 2023 - October 2024, Colombo, Sri Lanka

- Owned requirements elicitation and documentation for the platform's product roadmap, monetization strategy, and pricing, managing a team of 12 across development, marketing, and operations, and tracking KPIs and OKRs against business objectives.
- Identified and documented 30+ structured data points for match analysis, designing input templates that ensured consistent, clean data capture for downstream analytics.
- Conducted structured user research sessions with coaches, scorers, and analysts, translating qualitative feedback into documented requirements and acceptance criteria across multiple release cycles.
- Defined acceptance criteria and defect-detection protocols for beta testing with coaches and players ahead of general launch, managing stakeholder expectations across a compressed timeline.

Product Manager (Head of Product Scope)

Sling Mobility

June 2021 - October 2023, Colombo, Sri Lanka

- Functioned at Head of Product scope as the first employee, owning requirements definition and product direction across all 6 core modules with full autonomy, reporting directly to the CEO and board.
- Defined and documented functional and non-functional requirements across 6 core product modules (rider app, command center, battery management, swap station network, incentive engine, and subscription billing) spanning hardware and software layers, using Agile practices and KPI/OKR tracking to align delivery with business objectives.
- Mapped end-to-end operational workflows for battery lifecycle management, rider journeys, and B2B client onboarding, producing structured process documentation used by engineering, technology, and vendor teams.

- Established measurable acceptance criteria for IoT data outputs from the command center, validating data accuracy against operational outcomes, contributing to a 75% reduction in roadside incidents and extending battery lifetime from 2 to 4 years.
- Managed all stakeholder communication and vendor relationships across the CEO, board, engineering, vendors, and government bodies, acting as the primary liaison between business and technical functions and facilitating steering-committee-style decision-making forums throughout the product lifecycle.

Project Manager (FTC)

Motion Miracles

December 2020 - June 2021, Colombo, Sri Lanka

- Owned requirements documentation, user research, and feature specification for a FinTech BNPL product launch, acting as liaison between business stakeholders and the development team, and tracking KPIs and OKRs against program objectives.
- Delivered acceptance criteria and functional specifications for the KYC onboarding flow, aligned with fintech regulatory and risk management norms.
- Launched 23 hyper-casual games across multiple publishers, generating 200K SAR in new revenue.

Program Associate (FTC)

GOOD LIFE X

August 2020 - December 2020, Colombo, Sri Lanka

- Managed a 4-month accelerator program for 10 startups and founders building eco-friendly products across Sri Lanka, implementing an OKR and KPI framework to track progress against program objectives.
- Advised founders on pitch deck improvements and business case development to standardize presentations ahead of investor engagement.

Project Manager

Win Authority Innovative

July 2018 - August 2020, Wyoming, United States

- Delivered 8 SaaS and web application projects, eliciting requirements, documenting functional specs, and managing development teams within timeline, budget, and scope, tracking KPIs and OKRs against delivery goals.
- Supported business development through client pitching, risk-aware pricing, and resource planning, managing competing priorities and stakeholder expectations.

Project Manager (Intern)

MillenniumIT ESP

July 2017 - July 2018, Colombo, Sri Lanka

- Oversaw UAT for a 1.5M SAR core banking project, the highest-budgeted project led by an intern in the organization's history at the time, defining test scenarios, managing defect tracking, and coordinating sign-off between development teams and banking-sector stakeholders across a multi-country team.
- Presented weekly project strategies, risks, and timelines to banking VP-level stakeholders.

EDUCATION

Bachelor of Science (BSc) in Information Systems & Business Management

University of Westminster 2016 - 2019

CERTIFICATIONS

Project Management Professional (PMP) - Exam scheduled for September 2026

Project Management Institute

Fundamentals of Digital Marketing Certificate

Google Digital Garage
