### SUMMARY

---

Football performance analyst with hands-on experience supporting first team coaching staff through match and opposition analysis. Experienced in delivering concise video insights and performance reports to inform tactical preparation and post-match review. Brings an additional 8+ years of product and data management background, including building analytics platforms from scratch and translating raw performance data into decisions that non-technical stakeholders can act on quickly. Currently working with a competitive football club, providing pre-match, in-game, and post-match analysis using a customized analysis platform.

### CORE COMPETENCIES

---

**Analysis:** Coach Communication, Match & Opposition Analysis, First Team Performance Reporting, Video Tagging & Clip Presentation, Tactical & Technical Analysis, Player Development Insights

### WORK EXPERIENCE

---

#### Performance Analyst

November 2025 - Present

Glacis United FC

- Work directly with the first-team head coach, delivering match and player performance analysis to support tactical preparation, in-game decisions, and post-match review.
- Designed and implemented a custom performance analysis and data visualization workflow aligned with the coaching staff's tactical objectives and decision-making needs, applying the same platform-building discipline used to launch analytics products in previous roles.
- Conduct detailed match and performance analysis, combining quantitative metrics with qualitative match observation to identify tactical patterns, player roles, and areas for improvement.
- Deliver concise video clips and performance insights to coaching staff and players, supporting training focus, match preparation, and individual development.
- Provide player-specific analysis based on tactical responsibilities, decision-making, and contribution to team dynamics, while ensuring all final decisions remain with the coaching staff.

#### Player Performance Analyst & Recruiter

January 2024 - Present

MHFootballWorld

- Supported coaching staff by conducting comprehensive match and training session analysis to inform tactical decisions and player development plans.
- Utilized video analysis tools to conduct in-depth assessments of player performance, identifying technical strengths, tactical weaknesses, and potential areas for development.
- Developed and implemented data-driven training plans by correlating performance metrics with specific training objectives to optimize player improvement.
- Organized and managed training sessions efficiently, ensuring optimal utilization of resources and creating a positive training environment for players.

#### Head of Product

June 2019 - May 2025

Sports Data Analytics

- Developed and launched a user-friendly digital scoresheet application catering to diverse cricket playing conditions, enhancing data collection efficiency and directly informing the structured data capture approach applied to football match analysis.
- Gained extensive expertise in data management, analysis, and visualization to extract actionable insights for performance optimization, building dashboards used by coaches with no technical background.
- Utilized the platform to analyze player performance metrics in depth, identifying patterns, trends, and areas for improvement across 30+ live data points per match.

**Representations**

- Represented MCA in U15 tournaments and played for AW Academy for 6 years in the 3rd Division Cricket Tournament organized by SLC, gaining valuable competitive experience and developing leadership skills.
- Captained the team and conducted effective training sessions to foster teamwork, improve player morale, and enhance overall team performance.
- Achieved Best Goalie award in the IIT inter-house tournament through exceptional goalkeeping skills, demonstrating strong decision-making and reflexes.
