

THARIQ HAMAD

Product Manager – Digital Analytics & Measurement

Thariqhamad6@gmail.com | +966 56 344 1876 | <https://www.linkedin.com/in/thariqhamad> | Riyadh, KSA | Transferable Iqama

SUMMARY

Digital Transformation Project Manager with 8+ years of experience delivering end-to-end digital initiatives across enterprise SaaS, mobility, fintech, and analytics, working directly with business stakeholders, technical teams, and C-suite decision-makers across KSA and GCC. Experienced in translating complex business requirements into structured digital solutions, mapping and optimizing customer journeys, and coordinating cross-functional delivery teams from discovery through to acceptance. Experienced in defining measurement frameworks, KPI architectures, and data-driven feedback loops across complex digital products, including real-time operational dashboards, event tracking pipelines, and A/B experimentation across mobile and web. Currently studying Arabic directly applicable to client engagement with Arabic-speaking stakeholders. Based in Riyadh, Saudi Arabia, with a Transferable Iqama. Available immediately for on-site contract engagement in Riyadh.

EXPERIENCE

Senior Product Manager (FTC)

Fortude | Colombo, Sri Lanka (Hybrid)

October 2024 - January 2026

- Conducted structured requirements sessions with enterprise clients across KSA and GCC, translating complex ERP workflow needs into functional specifications. Presented roadmap, delivery status, and transformation outcomes at CSO and board level.
- Translated business requirements into structured product specifications for two digital SaaS solutions: an AI-powered test automation tool (Fortest) and an enterprise knowledge assistant (Charlie AI) working directly between business users, technical teams, and AI specialists.
- Analyzed target applications across multiple ERP client implementations to identify key workflow gaps and opportunities for automation, prioritizing transformation efforts by business logic complexity and strategic impact.
- Identified that product adoption was failing due to user trust issues, not technical gaps. Designed acceptance criteria and validation frameworks for AI output the first formal pass/fail measurement standard for AI-generated responses in the product.
- Designed and executed a structured stakeholder engagement campaign across KSA and GCC decision-makers, generating a SAR 7.5M pipeline with SAR 750K in immediate conversions from a SAR 3.75K budget (1,800% ROAS).
- Managed a cross-functional team of ~30 across development, QA, marketing, and sales. Built a centralized knowledge repository enabling regional teams to self-serve client documentation consistently across implementations.

Product Manager

Sling Mobility | Colombo, Sri Lanka

June 2021 - October 2024

- Owned the complete transformation program from discovery and requirements through solution design, build, and live deployment across 6 product modules, including IoT command center, rider mobile app, battery management system, swap station network, subscription billing, and incentive engine.
- Mapped the full rider journey from onboarding through daily usage and battery management. Identified that journey anxiety, not battery failure, was causing operational incidents. Redesigned the journey to surface real-time battery and station data, reducing roadside incidents by 75% and increasing daily rides from 25 to 62 per rider.
- Analyzed existing manual operations across vehicle dispatch, battery logistics, maintenance scheduling, and rider support. Translated findings into structured digital workflows that replaced manual processes across all operational functions.
- Reported directly to CEO and board throughout the program. Managed all vendor, partner, government body, and B2B client relationships. Presented delivery status, KPIs, and program outcomes at executive level on a regular cadence.
- Defined and implemented KPI frameworks across operational, rider behavioral, and product performance dimensions enabling data-driven governance decisions and surfacing early-warning churn signals that drove a 30% increase in MRR.
- Facilitated discovery sessions with riders, operations staff, and B2B partners to surface requirements across all program workstreams.

Product Lead

FieldR | Colombo, Sri Lanka (Remote)

June 2019 – May 2025

- Embedded with end users (coaches, scorers, analysts) to map existing workflows, identify pain points, and translate qualitative findings into structured product requirements a direct parallel to client discovery engagements in digital transformation programs.
- Applied A/B testing to validate service experience improvements across multiple user personas. Managed a team of 12 across development, marketing, and operations using Agile. Converted 75% of active users to paid subscriptions.

Project Manager (FTC)

Motion Miracles | Colombo, Sri Lanka

January 2021 - June 2021

- Consulted on a BNPL product launch within a consumer platform owned the requirements documentation, KYC workflow design, feature prioritization, and delivery coordination between business and development teams.
- Implemented KPI frameworks across studio functions. Managed project delivery for 23 digital product launches within timeline and budget.

Program Associate (FTC)

Good Life X | Colombo, Sri Lanka (Remote)

August 2020 - December 2020

- Managed a structured accelerator program for 10 startups implementing OKR tracking frameworks, facilitating milestone review sessions, and providing requirements and pitch deck advisory across the cohort.

Project Manager

Win Authority Innovative | Wyoming, USA (Remote)

August 2018 - December 2019

- Delivered 8 SaaS and web application projects end-to-end managing requirements, development teams, and stakeholder communication within timeline, budget, and scope.

Project Manager

MillenniumIT ESP | Colombo, Sri Lanka

July 2017 - July 2018

- Managed end-to-end project delivery for a core banking system implementation coordinating a multi-country development team across requirements, build, UAT, and client acceptance phases.
- Presented weekly project strategies, risks, and delivery timelines to banking sector VP-level stakeholders. Owned defect tracking, test sign-off coordination, and stakeholder alignment throughout UAT.
