

THARIQ HAMAD

Senior Product Manager - AI & Data Analytics Products

Thariqhamad6@gmail.com | +966 56 344 1876 | <https://www.linkedin.com/in/thariqhamad> | [Portfolio](#) | Riyadh, KSA | Transferable Iqama

SUMMARY

Senior Product Manager with **8+ years of experience owning the full lifecycle of AI and Data Analytics products** across enterprise SaaS and ERP environments. At Fortude, managed **two enterprise AI products end-to-end** on the Infor M3 ERP platform, defining product vision, roadmap priorities, AI validation frameworks, and customer solution design serving enterprise clients across **KSA, GCC, Australia, and the US**. Delivered measurable business impact: **75% lift in AI product adoption** and a **SAR 7M+ qualified pipeline** through a structured commercial approach. Experienced in translating complex customer business challenges into scalable AI-enabled solutions, collaborating with technical teams, and presenting product strategy at **CSO and board level**. Based in Riyadh, Saudi Arabia, with a transferable Iqama; available immediately.

PROFESSIONAL EXPERIENCE

Senior Product Manager

Fortude | *(Enterprise SaaS AI Products on Infor M3 ERP Platform)* | Colombo, Sri Lanka (Hybrid) *October 2024 - January 2026*

- Managed the **full product lifecycle of Charlie AI** an enterprise AI answer assistant for Infor M3 ERP users, from discovery and roadmap definition through model validation, enhancement planning, and adoption-focused delivery across **Australia and US enterprise clients**.
- Translated a customer-specific AI automation requirement from **Toyota Sri Lanka** into a scalable **AI Insight Agent** built on Charlie's architecture, transforming a viable customer solution into a **repeatable, scalable product offering**.
- Designed and implemented a formal **AI data validation framework** establishing pass/fail acceptance criteria for AI-generated output before delivery to enterprise users. **Lifted early-adopter usage by 75%** by addressing the root trust barrier rather than the assumed accuracy gap.
- Led product analysis for **Fortest**, an AI-driven automated regression testing product for Infor M3 ERP, developing a **complexity assessment framework** to prioritize AI test-generation efforts across Food & Beverage, Apparel, and LNG verticals.
- Conducted structured **requirements sessions with enterprise clients across KSA and GCC**, translating complex ERP workflow needs into functional specifications for development and AI learning teams.
- Built a **centralized knowledge data room** enabling regional teams to self-serve structured product documentation. Managed **~30 across engineering, AI specialists, marketing, and sales**; delivered product strategy at **CSO and board level**. Generated **SAR 7M+ pipeline with SAR 700K converted immediately** from SAR 3,750 in spend.

Product & Operations Lead (Employee #1)

Sling Mobility | *(EV Mobility & Battery-Swap Network)* | Colombo, Sri Lanka

June 2021 - May 2024

- Defined and documented requirements for **6 core product modules**: rider app, IoT command center, battery management, swap station network, incentive engine, and subscription billing across hardware and software layers.
- Built **real-time data infrastructure** tracking fleet telemetry, battery performance, and rider behavior, generating operational insights enabling **data-driven governance decisions and board-level KPI reporting**.
- Established **measurable acceptance criteria for IoT data outputs** from the command center, validating data accuracy against operational outcomes; **extended battery lifetime from 2 to 4 years** and **reduced roadside incidents by 75%** through validated charge-cycle optimization.
- Implemented **KPI frameworks across operations, rider behavior, and product performance**, enabling structured reporting and driving a **45% increase in monthly revenue** and a **30% increase in monthly recurring revenue** through an early-warning churn-signal feedback loop.
- Captured per-bike kilometer data to calculate **carbon footprint analytics**, generating carbon credits through a Singapore-based partner and creating an additional analytics-driven revenue stream.

Product Lead

FieldR | *(Sports Technology & Data Analytics SaaS)* | Colombo, Sri Lanka (Remote)

June 2019 - May 2025

- Designed the **data capture architecture** for a live sports analytics platform, **30+ structured data points per match**, ensuring consistent, clean data for coaching workflow analytics and decision support

- Conducted **structured user research** with coaches, scorers, and analysts; applied **A/B testing** to validate data presentation formats, feeding structured results back into product requirements across multiple release cycles.
- Converted **75% of active users to paid subscriptions** through data-driven UX improvements. Secured **SAR 20K pre-seed funding** from a state entity; expanded to Australia, signing 2 clubs.

Project Manager (FTC)

Motion Miracles | Colombo, Sri Lanka January 2021 - May 2021

- Owned KYC flow design, requirements documentation, and delivery coordination for a 0-to-1 BNPL product. Delivered 23 mobile game launches generating SAR 200K in new revenue.

Program Associate (FTC)

Good Life X | Colombo, Sri Lanka (Remote) August 2020 - December 2020

- Managed a cohort of 10 eco-focused startups; implemented OKR tracking frameworks and performance monitoring across the cohort.

Project Manager

Win Authority Innovative | Wyoming, USA (Remote) August 2018 - December 2019

- Delivered 8 SaaS and web application projects for US-based clients; owned requirements, development coordination, and stakeholder reporting.

Project Manager

MillenniumIT ESP | Colombo, Sri Lanka July 2017 - July 2018

- Managed a SAR 1.5M banking-sector IT project, the highest-budget intern-led project in company history; coordinated UAT and reported weekly to banking-sector VP stakeholders.
