

THARIQ HAMAD

Business Analyst | AI-Driven Test Generation & Knowledge Structuring

thariqhamad6@gmail.com | +966 56 344 1876 | <https://www.linkedin.com/in/thariqhamad> | Riyadh, KSA | Transferable Iqama

SUMMARY

Business Analyst with 8+ years of experience across AI product development, enterprise SaaS, and software delivery with direct hands-on exposure to AI-driven test generation, knowledge structuring for AI consumption, and validation framework design. At Fortude, owned the analysis and validation strategy for Fortest, an automated AI-driven regression testing solution for Infor M3 ERP, and built the knowledge and validation architecture underpinning Charlie AI's Answer Assistant. Experienced in eliciting requirements from enterprise stakeholders, translating complex application logic into structured documentation, and bridging the communication gap between business users, technical teams, and AI specialists. Currently studying Arabic directly applicable to communicating with Arabic-speaking stakeholders across KSA and GCC. Based in Riyadh, Saudi Arabia with a Transferable Iqama. Available immediately.

ROLE ALIGNMENT

Role Requirement	My Direct Experience
AI-driven test generation	Owned Fortest automated regression testing product for Infor M3 ERP across F&B, Apparel, and LNG verticals
Knowledge structuring for AI	Built structured knowledge and validation architecture for Charlie AI Answer Assistant and standalone AI Insight product
Validation criteria frameworks	Designed AI data validation agent to verify credibility of AI responses before delivery defining pass/fail criteria for AI output
Business logic complexity assessment	Prioritised test scenarios across multiple ERP client variants based on workflow complexity and business impact
Requirements elicitation & docs	8+ years of stakeholder interviews, process mapping, and functional requirement documentation across enterprise and startup environments
Arabic-speaking stakeholders	Currently studying Arabic embedded in the KSA market, familiar with communication norms across GCC enterprise clients

EXPERIENCE

Product Manager (FTC) | Fortude | Colombo, Sri Lanka (Hybrid) October 2024 - January 2026

- Led application analysis for Fortest, an automated regression testing tool for Infor M3 ERP. Identified key workflows and business logic scenarios across Food & Beverage, Apparel, and LNG verticals, translating application knowledge into structured test coverage criteria for AI-driven test generation.
- Developed a complexity assessment framework to prioritise AI test generation efforts scoring ERP workflows by business impact, frequency, and technical feasibility. Enabled the Learning Team to focus generation effort on highest-value scenarios first.
- Owned the structured knowledge architecture feeding Charlie AI Answer Assistant. Defined input templates, data credibility criteria, and response validation logic ensuring AI output met enterprise-grade accuracy standards before reaching end users.
- Designed and implemented an AI validation agent to verify data credibility before response delivery establishing the first formal acceptance criteria framework for AI output within the product. Increased early adopter usage by 75%.
- Conducted structured requirements sessions with enterprise clients across KSA and GCC, translating complex ERP workflow needs into functional specifications for the development and Learning teams.
- Built a centralised knowledge data room enabling regional teams to self-serve structured product documentation improving consistency of requirements input across multiple client implementations.
- Managed cross-functional collaboration across development, AI specialists, marketing, and sales teams of ~30. Presented product analysis and validation outcomes at CSO-level and board-level reviews.

Product Manager | Sling Mobility | Colombo, Sri Lanka*June 2021 - May 2024*

- Defined and documented functional and non-functional requirements for 6 core product modules rider app, command centre, battery management, swap station network, incentive engine, and subscription billing across hardware and software layers.
- Mapped end-to-end operational workflows for battery lifecycle management, rider journey, and B2B client onboarding producing structured process documentation used by engineering, operations, and external partners.
- Established measurable acceptance criteria for IoT data outputs from the command centre, validating data accuracy against operational outcomes reducing roadside incidents by 75% and extending battery lifetime from 2 to 4 years through validated optimisation.
- Managed all stakeholder communication across CEO, board, engineering, vendors, and government bodies acting as primary liaison across business and technical functions throughout the product lifecycle.

Product Lead | FieldR | Colombo, Sri Lanka (Remote)*June 2019 - May 2025*

- Identified and documented 30+ data points for match analysis, designing structured input templates for scorers that ensured consistent, clean data capture enabling reliable analytics output for coaching staff.
- Conducted structured user research sessions with coaches, scorers, and analysts translating qualitative feedback into documented product requirements and acceptance criteria across multiple release cycles.
- Applied A/B testing to validate data presentation formats for coaching workflows documenting results and feeding findings back into structured product requirements.

Project Manager | Motion Miracles | Colombo, Sri Lanka*December 2020 - June 2021*

- Consulted on a FinTech BNPL product launch owned the full requirements documentation, user research process, feature specification, and KYC workflow design. Acted as liaison between business stakeholders and the development team.
- Delivered acceptance criteria and functional specifications for the KYC onboarding flow, aligned with fintech regulatory norms.

Project Manager | Win Authority Innovative | Wyoming, USA (Remote)*July 2018 - August 2020*

- Delivered 8 SaaS and web application projects eliciting requirements, documenting functional specs, and managing development teams within timeline, budget, and scope.

Project Manager | MillenniumIT ESP | Colombo, Sri Lanka*July 2017 - July 2018*

- Oversaw User Acceptance Testing for a core banking system defining test scenarios, managing defect tracking, and coordinating sign-off between development teams and banking sector stakeholders.
- Presented weekly project strategies, risks, and timelines to banking VP-level stakeholders. Managed a multi-country development team across requirements, delivery, and acceptance phases.

EDUCATION & CERTIFICATIONS**Bachelor of Science (BSc) in Information Systems with Business Management**

University of Westminster

*2016 - 2019***Project Management Professional (PMP) - Ongoing**
